Caro cliente,
Estimado cliente,
Obrigado pelo seu pedido!

Independentemente de o móvel que comprou ser feito de madeira maciça, ou de ter a frente feita de uma placa de alto brilho, ou de uma placa revestida com plástico fosco - cada peça de mobiliário tem as suas próprias propriedades especiais. As propriedades da estrutura da madeira - como pequenos grãos em móveis de madeira natural - também conferem ao móvel um carácter individual.

Como os móveis de madeira natural estão constantemente expostos à humidade e às intempéries, podem surgir ocasionalmente alterações na sua superfície, como descoloração ou riscos. Com o tempo, a saturação da cor pode mudar e a madeira pode escurecer.

As alterações referidas que ocorrem na aparência dos produtos feitos com matérias-primas naturais são completamente normais. Este manual contém dicas valiosas sobre o cuidado dos móveis para que possa desfrutar da sua aparência impecável durante o maior tempo possível.

Regras básicas:

- Não coloque objetos quentes sobre os móveis.
- Não coloque velas diretamente nos móveis.
- Se derramar água, limpe imediatamente.
- Verifique regularmente se os parafusos estão apertados e se os acessórios estão bem fixos.
- O cheiro característico e aromático da madeira, presente nos móveis de madeira natural, é sinal de um produto de elevada qualidade.
- As manchas brilhantes no grão são provocadas por resina - podem ser polidas com um pano seco e que não deixe marcas.
- No caso de materiais feitos de outros tipos de madeira ou couro, produtos envernizados ou estofos, há também um cheiro característico de “novo” no início. Este cheiro desaparece após algum tempo de utilização do produto. Se pretender eliminar este cheiro mais rapidamente, recomendamos arejar frequentemente os ambientes e/ou limpar os móveis com um pano ligeiramente humedecido com água e um pouco de vinagre.
- Guarde estas instruções num local seguro.

Dicas para cuidar de móveis de madeira natural lixiviados/oleados

A superfície dos móveis adquiridos foi protegida com óleo biológico puro. Para manter o brilho natural da superfície, recomendamos esfregá-la de vez em quando com óleo para móveis. Após proteger a superfície com óleo, recomendamos a sua limpeza com um pano que não deixe marcas. O pano deve secar após a utilização e depois pode ser deitado fora.

Dicas para cuidar de móveis de madeira natural não tratada/manchada

O melhor é limpar a superfície do móvel com um pano húmido.

Nota: Não utilize agentes de limpeza ou solventes agressivos.

Dicas para cuidar de móveis feitos de tábuas de madeira

É melhor usar um pano macio que não deixe marcas para cuidar dos móveis. A superfície deve ser limpa com um pano ligeiramente húmido.

Regras básicas:

Nunca utilize os seguintes agentes/dispositivos de limpeza:

- panos ou esponjas de microfibra para remover sujidade. Muitas vezes contêm partículas abrasivas que podem riscar a superfície;
- produtos químicos agressivos, p.e., agentes abrasivos ou solventes. Podem danificar a superfície;
- pós de limpeza, palha de aço ou panos afiados. Podem danificar permanentemente a superfície;
- aspirador de pó. A escova do aspirador pode riscar a superfície;
- limpadores a vapor. A alta pressão e a humidade podem danificar a superfície e fazer com que o material se desintegre.
